KIENI'S FINEST

PRODUCT CATALOGUE

HEAVY ENGINEERING BRANDS

What can we make for you? From drilled base plates and heavy flanges to precision shafts and welded frames — real products, not just machines. If it needs bolt holes, turning, milling, forming or finishing, we build it.

Products: Base Plates, Flanges, Shafts, Frames

ISO 9001:2015 Certified Workshop

For Industries That Cannot Move Heavy Parts

Made with: Full workshop — radial drills, centre lathes to 7000mm, CNC mills, shapers, press & welding bay

We Make What You Need

- BASE PLATES
- LARGE FLANGES
- MACHINE HOUSINGS
- STEEL BEAMS
- PRECISION SHAFTS
- WELDED FRAMES

ISO 9001 BUREAU VERITAS

01 DRILLING — WHAT WE DRILL

You bring heavy, immovable work — we deliver finished holes. Base plates, flanges, structural beams and machine housings with accurate bolt-hole patterns, from small batches to one-off large fabrications.

BASE PLATES
Welded • Drilled • 6-40mm thick

IN STOCK CAPABILITY

LARGE FLANGES
Bolt Holes • PCD Drilling

IN STOCK CAPABILITY

STEEL BEAMS
Beams • Channels • Columns

IN STOCK CAPABILITY

MACHINE COMPONENTS
Housings • Brackets

PRODUCTS SHOWN

BASE PLATES	Welded • Drilled • 6-40mm thick
LARGE FLANGES	Bolt Holes • PCD Drilling
STEEL BEAMS	Beams • Channels • Columns
MACHINE COMPONENTS	Housings • Brackets

MADE WITH

Made with: G. Breda R45-1210 (50mm, 2000mm arm) • Churchill R-50 • Grimston Geared-Head • Pedestal Drill

CUSTOMER SEES PRODUCT FIRST

Products: Base Plates, Flanges, Beams, Housings

Features: Bolt Holes Ø up to 50mm, 2000mm reach

Uses: Structural Steel, Machine Bases, Repair

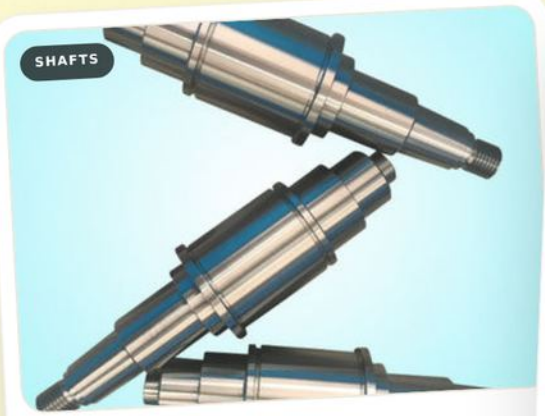

ISO 9001

02 LATHES & TURNING

Raglan Little John (610 mm between centres), Viking (1,800 mm bed), C. Catilano Meuser (up to 7,000 mm), TOZ, Excel, Texpart 1-8 changer. Centre lathes from compact toolroom size to extra-long beds for very long work. The workpiece rotates while a fixed tool cuts it: turning, facing, boring and thread cutting.

Available 610mm to 7,000mm Long

Process: Turning, Facing, Boring

BUSHES

Bronze • Steel • Flanged

THREADED BARS

Lead Screws • Studs • Bars

Products: Shafts, Rollers, Bars, Bushes

For Engineering, Repair Shops, Long Components

ISO 9001

03 + 04 SHAPERS & MILLING — WHAT WE MACHINE FLAT

Flat faces, slots, keyways, pockets and profiles. Perfect for machine beds, slideways, dies, mould bases and heavy fabrication plates that need to be truly flat and square.

FLAT SURFACES
Milled • Ground • 8200mm
IN STOCK CAPABILITY

SLOTTED BLOCKS
T-Slots • Keyways
IN STOCK CAPABILITY

MACHINE BEDS
Beds • Guideways
IN STOCK CAPABILITY

POCKETS & PROFILES
Pockets • Contours

05 BENDING — PLATE, TUBE & PIPE

200-tonne heavy-duty bender (up to 80 mm); plate bending machine; Dropsa tube and pipe bender (Milan, Italy). Machines that form plate, thick sections, tube and pipe into curves and angles. Metal is forced into shape with controlled pressure, around rolls or dies, until the required angle or radius is reached.

Up to 80mm Thick & 200T Force

Cylinders, Cones, Bent Plate

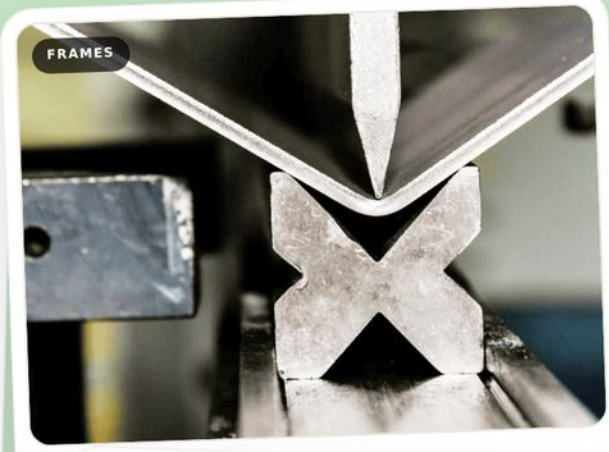

Rolled

CONES
Cones • Reducers • Hoppers

BENT PLATE
Bent • Curved Plate

FR
Cu

For Structural, Tank & Pipe Work

HANDRAILS
Pipe Bends • Handrails

PIPEWORK
Tube • Pipe Bends

Italy Dropsa Bender

06 PRESSING — HEAVY FORMING

Finlay Engineering 420-tonne press; GL 190PS precision press (over 1,000 tonnes, up to 750 PSI).
High-capacity presses for heavy forming and straightening.

420 Tonne & 1000+ Tonne Presses

LARGE PRESSED COMPONENTS
Heavy • 420-1000T • Formed

Up to 750 PSI

STRAIGHTENED SECTIONS
Straightened • True • Heavy

PRESSED BRACKETS

07 CUTTING — LASER, SHEAR & SAW

6000 W CNC laser (up to 40 mm plate, 6,500 mm bed); Gillotin plate cutter (13 mm); circle cutter (up to 2 ft); GEKA 6-in-1; Ben saw (400 x 500 mm). Laser, shear, circle and multi-function cutting for plate, sheet and sections. The laser follows a CNC path through the plate; the Gillotin shears straight lines; the circle cutter produces round blanks.

6000W Laser, 40mm Plate, 6.5m Bed

PLATE BLANKS
Laser • Up to 40mm

DISCS
Ø50-600mm • 2ft Circle

FLANGES
Flanges • Bolt Ready

13mm Guillotine, 2ft Circle Cutter

WASHERS
Large Washers • Spacers

PROFILES
CNC Profiles • 6.5m

400X500 SECTIONS
Sawn • Ben Saw

GEKA 6-in-1 & Ben Saw

Clean Cut Blanks

Nyeri & Nanyuki • Kenya

08 GROOVING — SHEET GROOVING

Sheet grooving machine (up to 2 mm sheet). Cuts clean, consistent grooves into thin sheet metal. Sheet is fed through the machine, which cuts a groove of even depth along the line.

Up to 2mm Sheet

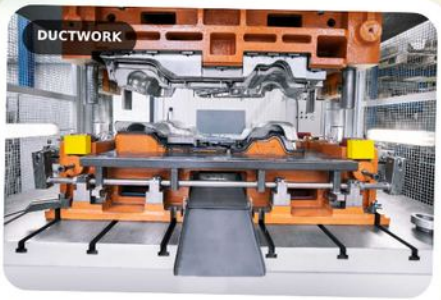

GROOVED SHEET
Up to 2mm • Ready to Fold

CLADDING PANELS
Grooved • Architectural

Clean Consistent Grooves

DUCTWORK SECTIONS
For Bending

FOLD-READY SHEETS
Consistent Depth

For Cladding, Panels, Ductwork

09 GRINDING — PRECISION FINISHING

ALPA RT 700 NC surface grinder; Cantaluppi MCF 300; pin and shaft grinder. Precision grinders for fine finishes and tight dimensional accuracy. An abrasive wheel removes very thin layers until the part reaches size and surface finish.

Tight Dimensional Accuracy

ALPA RT 700 NC + Cantaluppi MCF 300

10 WELDING — FULL RANGE

Arc (DC600), MIG Warrior 750i, TIG, spot, plate spot and laser welding machines. A full range of welding processes, from heavy structural to fine stainless work. Arc and MIG melt metal and filler into a joint; TIG gives precise control; spot welders use pressure and current; the laser makes narrow, low-distortion welds.

Structural Steel, Stainless & Aluminium

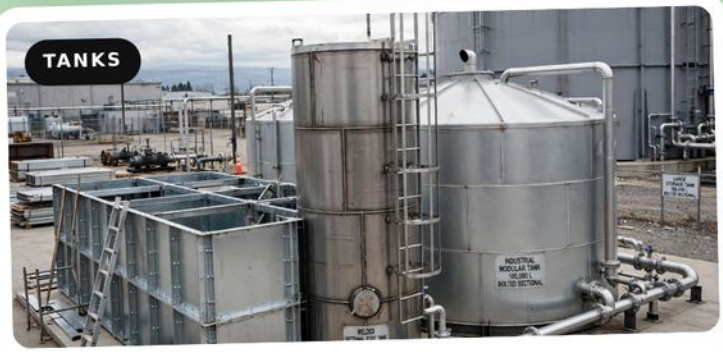

Arc DC600, MIG Warrior 750i, TIG, Laser

FRAMES
